TECHNICAL SKILLS

Languages

Dart, Python, Java, Javascript, SQL

Mobile

Flutter, Responsive UI

State Mgmt.

GetX, Provider

Architecture

Clean Architecture, MVVM, Repository Pattern

Backend

Firebase, REST APIs

Databases

Firestore, Isar, SQLite, SQL

AI

Machine Learning, Basic Deep Learning, TensorFlow, Prompt Engineering, Audio Classification

Tools

Git, GitHub, Docker, Node-RED, Android Studio, VS Code, Postman

LANGUAGES

Arabic — Native

English — Professional Working

French — Intermediate

EDUCATION

License Degree in Information Systems

University of Medea, Algeria [2022]

Master's Degree in Systems

Engineering and Web Technologies

University of Medea, Algeria [2024]

Professional Summary

Flutter app developer passionate about developing innovative apps that improve users' lives. Experienced in building production-ready cross-platform mobile applications using Flutter, Clean Architecture, Firebase, REST APIs, and offline-first architectures. Keen to keep up with the latest developments in the field, and constantly working on developing my skills.

Projects

Insulin Resistance Diet AI (Glyvia)

Flutter, Firebase, AI

- Developed an AI-powered nutrition application for insulin resistance assessment and personalized recommendations.
- Implemented Clean Architecture, Firebase Authentication, Firestore, Analytics, Remote Config and Isar offline storage.
- Optimized the application for Google Play Store (ASO) and continuous releases.

Baby Supervise — Digital Twin Infant Monitoring

Flutter, Django, TensorFlow

- Built a Digital Twin platform for early recognition of infant discomfort using cry analysis.
- Integrated Flutter, Django REST APIs, Eclipse Ditto and Node-RED.
- Developed deep learning models achieving over 96% classification accuracy.

Learn English: SnapQuiz AI

Flutter, Firebase

- Built an AI-assisted English learning application with Firebase backend and modern Flutter architecture.

Kids AI Stories

Flutter, Firebase

- Developed an AI-powered storytelling application with cloud backup and multilingual support.

Additional Projects

Task Wise Application

Flutter, GetX, Clean Architecture

Podcast Application [Download APK]

Flutter, Firebase

Student Attendance Management System [Download APK]

Flutter, PHP, SQL

File Management Application [Download APK]

Flutter

Independent Flutter Development

Personal & Freelance Projects

2022–Present

- Designed and developed multiple cross-platform Flutter applications from concept to deployment.
- Integrated REST APIs, Firebase services, and offline-first local databases.
- Published multiple Android applications on Google Play.
- Built reusable architectures and scalable codebases using Clean Architecture and GetX.
